

Corporate Profile

WINNERS DON'T DO DIFFERENT THINGS, THEY DO THINGS DIFFERENTLY WINNERS DON'T DO DIFFERENT THINGS, THEY DO TH

COMPANY OVERVIEW

Veritec Information Systems “Veritec”, a system integration company, was founded in 2005 to provide an outstanding service in Abu Dhabi’s demanding market.

Veritec is a mature organization delivering IT products, solutions and services to businesses ranging in size from 5 to over 10,000 users. Our services range from communication, security, audio visual & broadcasting solutions, ELV systems through to fully managed IT systems.

Our teams are well trained, skilled, long-serving, conscientious and motivated on your behalf.

Mission

Our mission is simple: make technology an asset for your business not a problem.

Vision

To be the company that best understands and satisfies the product, service and quality needs in system integration.

Communication

STRUCTURED CABLING

Veritec is a leading cabling and infrastructure specialist. Our complete solutions can support any voice or data application and are designed to future proof your network infrastructure. In fact, we are so confident about the quality of our solutions that they come with a 20-year application warranty, guaranteeing performance.

Copper Infrastructure Cabling Solutions

Independently verified screened and un-screened data communication structured cabling solutions, providing ultimate performance and reliability for today's and tomorrow's copper infrastructure requirements. Our Cat 6 solutions meet TIA standards.

Fiber Optic Cabling Solutions

Conventional (fiber) cabling solutions that compliment the deployment of optical solutions deeper into the network delivering a future-proof infrastructure.

Low-voltage Cabling Solutions

Solutions that include music and paging systems, CCTV and security systems, fire alarms and access control systems.

Communication

DATA CENTER DESIGN

At Veritec, our data center designs reflect the latest thinking on data center design. These include providing highly reliable, energy efficient, LEED certified data centers that are both modular and scalable.

Modular designs are used so the Data Center can be built in phases and scalable so that they can be increased in capacity as the densities increase.

Our design services are based on listening to the client and understanding their business needs.

We design what the customer wants, not some pre-conceived idea of what we believe you should have. This understanding results in a team environment that is key to achieving a successful project. We approach design projects with all options open for discussion.

Communication

TELEPHONY SYSTEMS

Veritec has the expertise to install and support all major brands of telephone systems.

Choosing the right telephone system is an important decision, we can help you decide what your current needs are as well as what your needs might be 5 years down the road.

With features like—automated call distribution, voice mail, unified messaging, call accounting and many more, the choices can seem overwhelming.

Veritec will assist you in your options and help you understand how they might benefit your business.

Security

CCTV

We can help design any kind of CCTV access control and closed circuit television systems for both residential and commercial installations including: retail stores, commercial buildings, manufactures and private homes.

CCTV surveillance systems are now widely used. People are using closed circuit systems with remote viewing to deter crimes of burglary break-ins of residential and commercial property.

CCTV can also be used to monitor employees and increase production. One of the best ways is to install an indoor/outdoor surveillance system.

This kind of system records any movements straight to your hard drive and can be viewed from anywhere in the world.

Security

ACCESS CONTROL

Veritec specialists are well versed in providing access control systems that go far beyond simple door-access. Our complete capabilities in this area can be fully integrated with building automation and IT asset protection solutions that secure your business, protect the people in it and safeguard the valuables it holds.

With experience in designing and installing for multiple locations and a wide variety of readers, keys and sensors, Veritec's specific access control services feature:

- Installation capabilities for card readers, door access, elevator access and biometric readers
- Smooth integration with existing networks
- Remote manageability via web browser
- User defined system responses and alarms and complete access management for maximum security

PUBLIC ADDRESSING

Our expertise covers all aspects of Public Address, Background Music and Voice Evacuation Systems.

We are able to provide a wide range of applications and capabilities, from basic to the most complex systems.

Each system is designed to provide optimum performance and reliability, whatever its surroundings.

With the emphasis on Public Address Systems moving ever more into public safety our systems provide a complete audio communication package, capable of meeting all necessary standards.

SMATU

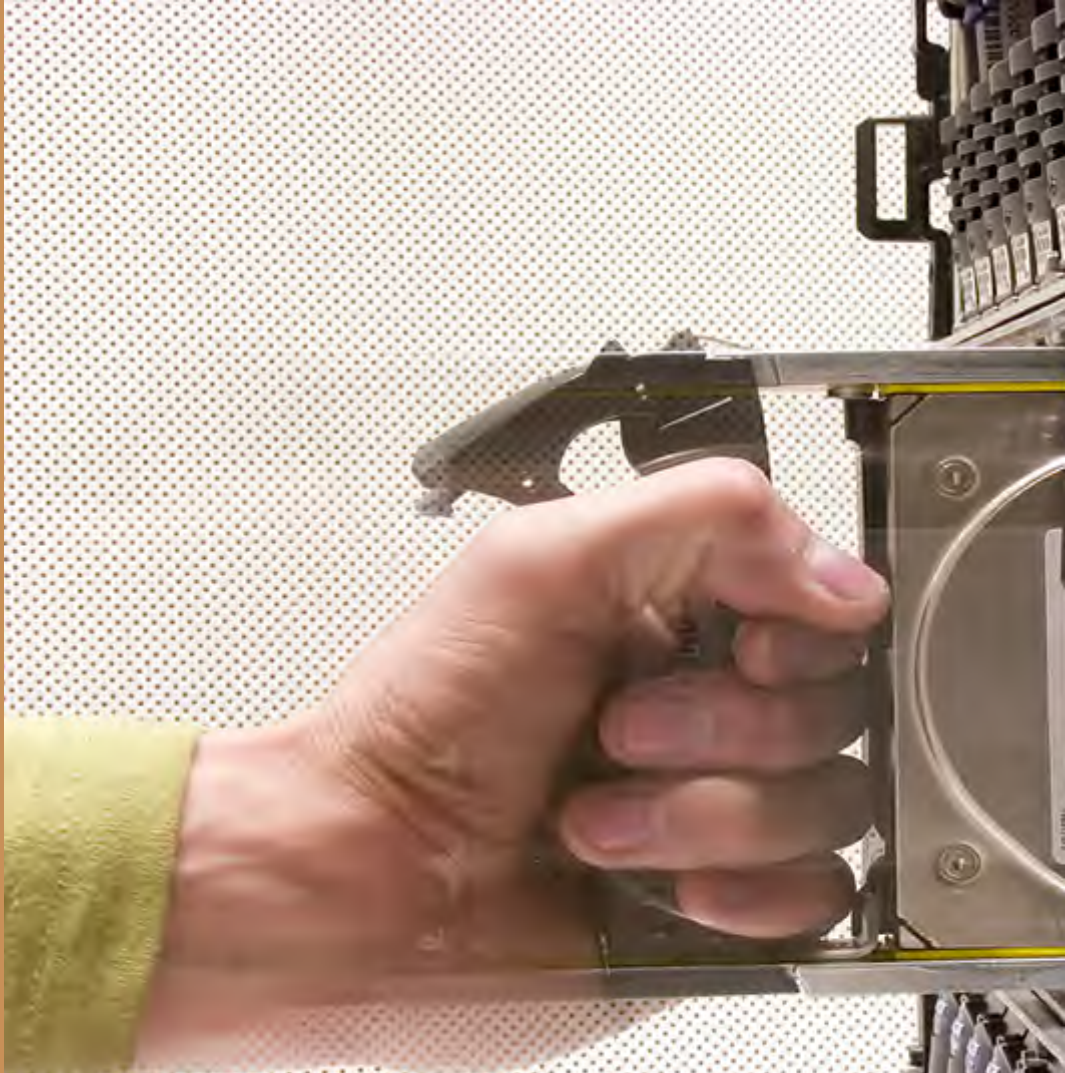

From a basic aerial installation to a multi point satellite and aerial distribution system Veritec is here to help.

Veritec can provide a complete end-to-end service to meet your needs, budget and expectations.

By providing you with all the information that you'll need, Veritec will help you to make an informed choice of digital reception and audiovisual solution.

We offer a number installation solutions using benchmarked equipment to ensure that you receive the best possible solution and quality.

Installation Services

INSTALLATION SERVICES

If it needs to be installed, Veritec has an installation service to do it.

Veritec has packaged installation services for over 80% of the most frequently purchased information technology and audio/video products on the market today.

Servers, Storage & Power Installations
